

Merus

Merus N.V. to participate in Webcast on Making a name in cancer immunotherapy

June 12, 2017

Utrecht, The Netherlands— June 2017 —Ton Logtenberg, Founder and Chief Executive Officer of Merus N.V. will participate in a BioPharma Dealmakers webcast sponsored in part by Merus N.V., featuring three other companies innovating cancer immunotherapy. The webcast, part of the BioPharma Dealmakers series, is scheduled for 5:00 pm CEST on June 13th.

[> Webcast registration link](#)

This webcast will feature a range of cancer immunotherapy innovations and explain how they are advancing progress within immuno-oncology. Technologies covered within the webcast will include: Biclomics, differentiated bispecific antibody therapeutics; LAMP-Vax, a unique immunotherapy platform creating DNA-based vaccines; targeted radioimmunotherapies, antibodies delivering radioisotopes and a precision engineering platform IsoCode for predictive cell response.

The webcast will conclude with a live roundtable discussion and a Q&A section to allow you to participate and put your own questions to the speakers.

Prof. Logtenberg previously founded U-BiSys, a biotechnology company that merged with IntroGene to become the publicly-listed company Crucell. In 2006, Logtenberg founded and became the CEO of Merus NV, a Nasdaq-listed biotechnology company based in both the Netherlands and the US, focusing on human bispecific antibodies based on the full length IgG format for the treatment of cancer patients.

Other webcast participants include:

- **Sia Anagnostou**, Senior Director of Corporate Development, Immunomic Therapeutics, Inc
- **Sean Mackay**, Co-Founder, Chief Executive Officer and Director, IsoPlexis
- **Dr. Mark Berger**, Chief Medical Officer, Actinium Pharmaceuticals, Inc.

- **Moderator: Raveena Bhambra**, Editor of *BioPharma Dealmakers*. Raveena has worked in the biopharma industry for over 10 years specifically in the areas of dealmaking, partnering and licensing.

About the Webcast

[BioPharma Dealmakers webcasts](#) are dedicated to small and large companies looking for commercial partnerships. Read the quarterly [BioPharma Dealmakers supplement](#) in *Nature Biotechnology* and *Nature Reviews Drug Discovery*.

About Merus N.V.

Merus is a clinical-stage immuno-oncology company developing innovative full-length human bispecific antibody therapeutics, referred to as Biclomics®. Biclomics® are based on the full-length IgG format, are manufactured using industry standard processes and have been observed in preclinical studies to share several features of conventional monoclonal antibodies, such as long half-life and low immunogenicity. Merus' lead bispecific antibody candidate, MCLA-128, is being evaluated in a Phase 1/2 clinical trial in Europe as a potential treatment for HER2-expressing solid tumors. Merus' second bispecific antibody candidate, MCLA-117, is being developed in a Phase 1 clinical trial in patients with acute myeloid leukemia. The Company also has a pipeline of proprietary bispecific antibody candidates in preclinical development, including MCLA-158, which is designed to bind to cancer stem cells and is being developed as a potential treatment for colorectal cancer and other solid tumors, as well as Biclomics® designed to bind to various combinations of immunomodulatory molecules, including PD-1 and PD-L1.
